What did you particularly like about the workshop?

1. I enjoyed the scenarios because problems did occur while trying to make changes or inputting the data. The staff presenting the workshop was very knowledgeable on how to overcome the problems.
2. I liked that it was an “on your own” workshop. The scenarios were real and easy to do with the instructions.
3. The CIMC instructor instead of the rude person that usually does Bear Tracks.
4. Receive handouts that are helpful for Bear Tracks.
5. Really like the individual assistance. Instructors very willing to help.
6. I really needed the hands-on exercises since I am WIA and 477 programs. The Bear Tracks system will be very helpful for 477 reporting.
7. Very helpful with hands-on.
8. Hands-on.

Comments:

1. All Bear Tracks workshop were filled to the maximum. I recommend have a bigger lab or even a bigger room just an area where people can sit and watch. Didn't really feel that the Bear Tracks representatives took comments to heart. Improvements were nice yet some things still were not managed or sounded as if they weren't going to be.
2. Excellent job!
3. Thank you!
